

The whole pricing argument, on one line

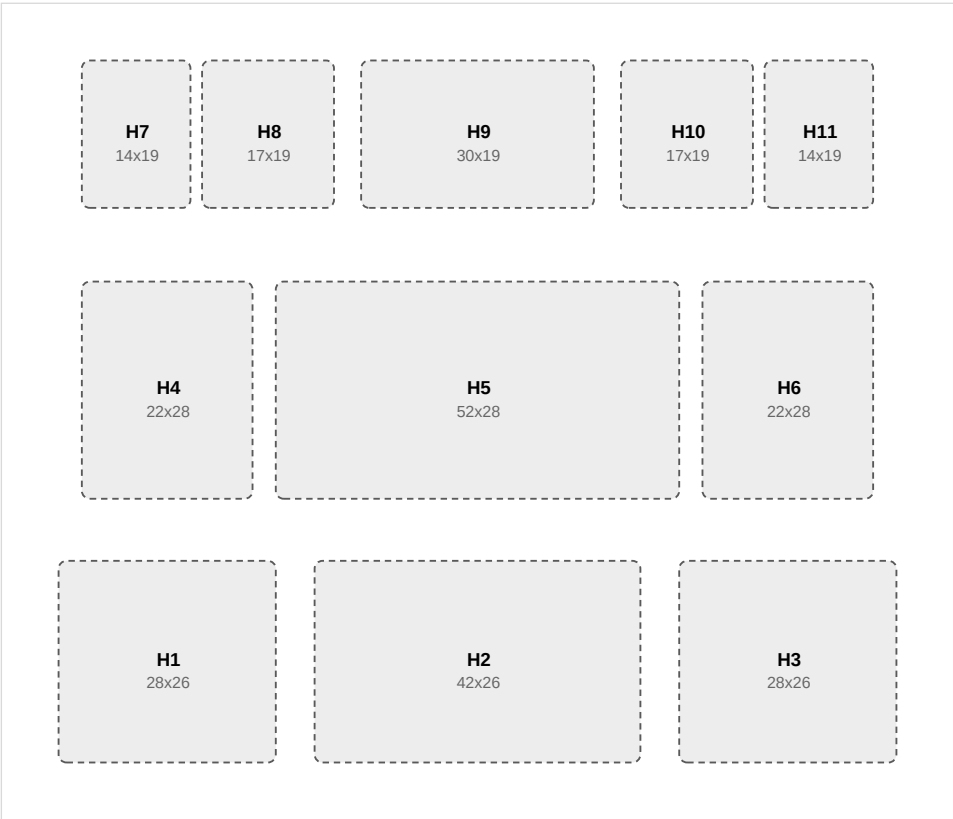

82 priced zones. Every one at ask. They add up to exactly \$135,000 - the price of the car, not a target anyone picked. Six XS zones at \$250 sit outside that total and pay running costs.

ARTWORK SPECIFICATION

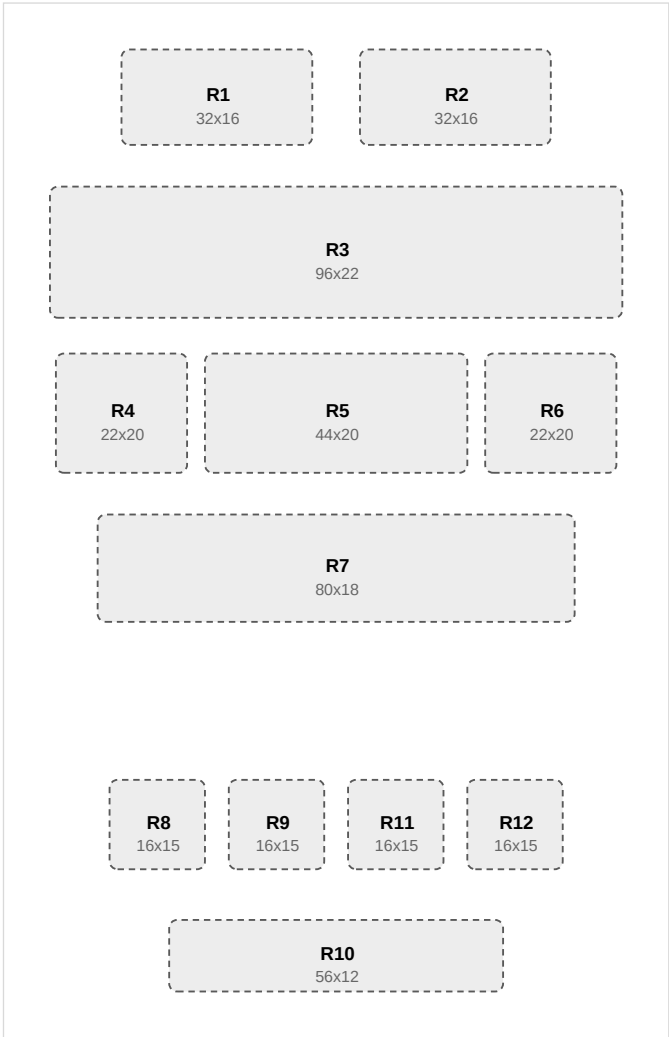

Format	Vector preferred - SVG, PDF or EPS with outlined type. Otherwise PNG at 300dpi at final size, with transparency.
Colour	CMYK-safe. Anything outside CMYK gamut will be matched as closely as the printer allows; neon and metallics will not reproduce.
Bleed	Add 5mm bleed on every edge. Keep type and logos 8mm inside the trim.
Contrast	The car is silver. Pure white artwork disappears; give white marks a keyline or a background.
File names	ZONEID-brand.svg, e.g. H5-acme.svg, so nothing gets applied to the wrong panel.
Deadline	Files are due 48 hours after the auction closes. Miss it and the zone is re-offered to the next bidder.

Hood from above, nose at the top

50 cm

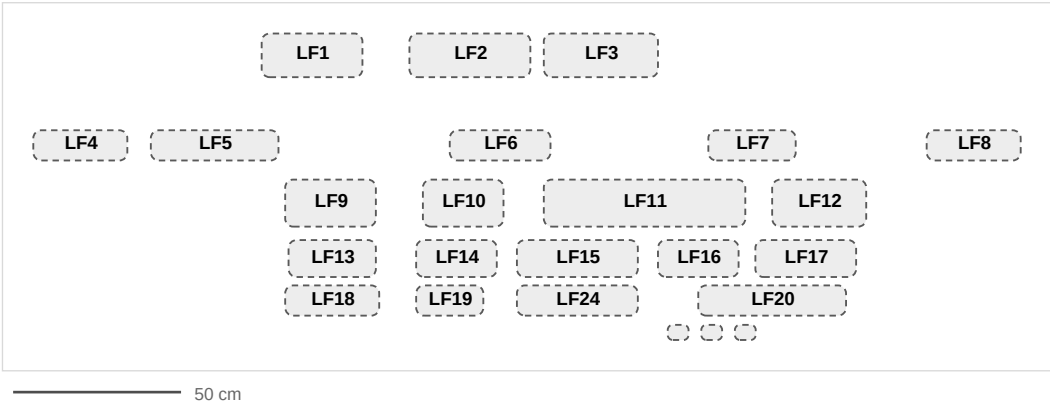

Roof from above, windscreen at the top

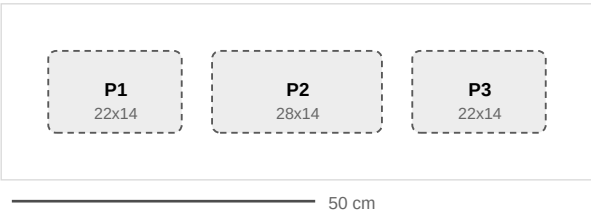

50 cm

Sizes are the printed decal size in centimetres, width x height, measured on the panel.

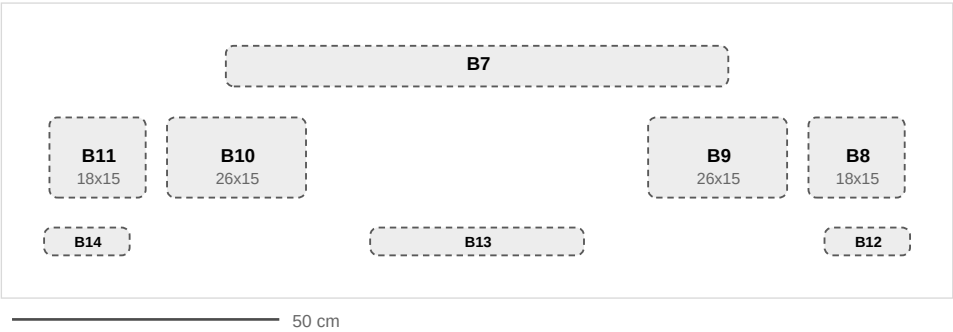

Left flank from the kerb, nose to the right

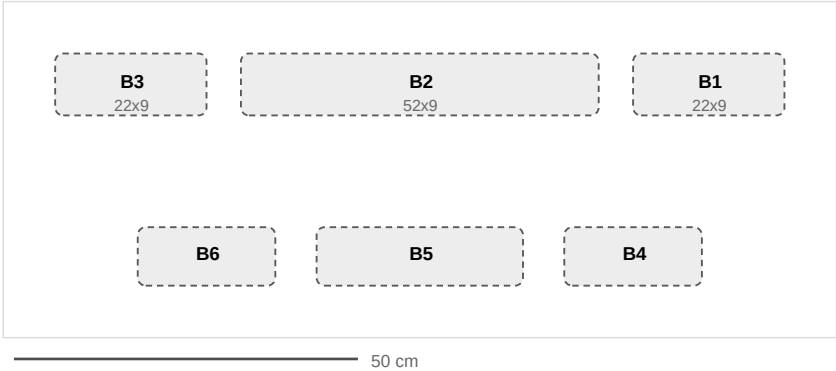

Front bumper from the front

Rear face from behind

Rear deck engine lid and spoiler, from above

The right flank mirrors the left exactly: same z, same height, same sizes, ids RF1-RF20.
